

# AllInvest: Software Requirements Specification

Software Engineering project · Version 1.0 · Status of all requirements: Proposed

## 1. Introduction

**Purpose.** This document lists the functional and non-functional requirements of AllInvest, a web platform where young project holders present their ideas and where mentors and investors can browse these projects and contact the holders for more information.

**Scope.** The system covers accounts, project presentation, browsing and search, and contact. It does not handle funding or payments.

**Users.** Project holder, mentor, investor and administrator. Browsing needs no account; contacting a holder requires a registered mentor or investor account.

**Format.** Each requirement has a unique ID and describes one function.

## 2. Functional requirements

| ID   | Requirement                                                                                                                             |
|------|-----------------------------------------------------------------------------------------------------------------------------------------|
| FR1  | The system shall allow a visitor to register as a project holder, a mentor or an investor.                                              |
| FR2  | The system shall authenticate registered users with an email and a password.                                                            |
| FR3  | The system shall allow users to edit their profile information.                                                                         |
| FR4  | The system shall allow a project holder to create a project page with a title, category, description, goals and needs (skills, budget). |
| FR5  | The system shall allow a project holder to edit and delete their own projects.                                                          |
| FR6  | The system shall allow all visitors to browse the list of published projects.                                                           |
| FR7  | The system shall allow visitors to search projects by keyword.                                                                          |
| FR8  | The system shall allow visitors to filter projects by category.                                                                         |
| FR9  | The system shall display the full details of a project on its own page.                                                                 |
| FR10 | The system shall display a contact section at the end of each project page.                                                             |
| FR11 | The system shall allow registered mentors and investors to send a message to a project holder through the contact section.              |
| FR12 | The system shall notify the project holder by email when a message is received.                                                         |
| FR13 | The system shall allow a project holder to view the messages received about their projects.                                             |
| FR14 | The system shall allow an administrator to remove inappropriate projects and user accounts.                                             |

## 3. Non-functional requirements

| ID   | Requirement                                                                          |
|------|--------------------------------------------------------------------------------------|
| NFR1 | The system shall return search results in less than 2 seconds.                       |
| NFR2 | The system shall transmit all data over HTTPS.                                       |
| NFR3 | The system shall allow only the owner of a project or an administrator to modify it. |
| NFR4 | The system shall support at least 100 simultaneous users.                            |
| NFR5 | The system shall provide its interface in English and French.                        |
